Hi Angelina,

Attached is the revised proposal that incorporates the retro style bulb.  
The bulb price came out cheaper than they originally quoted me which is great.  
It's a custom bulb so there is about a month lead time once we give approval.  
Also to note on the proposal, extra bulbs are included in this for us to keep on hand.

In terms of Bob reviewing the different bulbs, he has not had a chance to in person and we decided to have the board take a look at the options as well during the April meeting. I'm pretty confident they'll pick the retro bulb as well, as it's clearly the best choice in terms of look and light output.

I did find out the retro bulb has a greater wattage output, which means I'll need to get a revised contract/flat rate from DWP and get board approval again in April.

Regarding the mural, Bob is good with meeting directly after the April board meeting.

Any questions let me know.

Thanks,  
Aaron
